

# AI Skin Disease Diagnosis Report

**Date:** 2025-07-14 16:47:58  
**Name:** abdullah masood | **Age:** 18 | **Phone:** 03350806140

**Disease Detected:** **Melanoma**

**Recommended Treatments:**

Type	Form	Name	Instructions
Surgery	Wide excision	Tumor removal with margins	Performed under local or general anesthesia.
Cream	Topical	Imiquimod (early stages only)	Use only under oncologist guidance.
Tablet	Oral	Dacarbazine	Chemotherapy under specialist supervision.

**Prevention Tips:**

- Early detection is critical.
- Avoid sunburns, use SPF 50+, get moles checked yearly by a dermatologist..
